

Dear Doctor,

Congratulations! I have known about your medal of freedom. I think that you should have merited more than it.

But you must know that you merit the respect and the love of the people that have met you.

The man, as you is an example of life and of love that all should imitate.

I'm glad about the merit that you have receipt, because is a tangibile witness of your involvement.

I hope that the Americans people will confer to you others honors, and that I can see you again.

with love
Dario Aramendola
