Dear Hector,

Thanks for the pictures, Mary and I enjoyed them very much and then we saw the rest of them in the Bulletin. It certainly was a nice Christmas present since we were away from home.

Ask Jimmy to see what can be done about changing the Constitution to include non-American citizens of another country. In other words something like the Labor, Rotary, and Lions International. I see a bunch of people here with Lions Clubs emblems.

We have had no trouble adjusting and furthermore we like the Ecuadorians. There is of course much to do as the problems here are almost beyond reasonable solution. However we have a good director and we are giving it everything we have. If we succeed we'll beat the Communist threat, if we don't we'll see you soon.

I can understand your misgivings of John Connolly. I've known his family for many years. Ed went to school with him and I went to school with his younger brothers, but that doesn't mean a damn thing. The oil industry has him well under control.

Good luck and write when you can about EG Forum.

In Amigo,
Charlie
