

Apr 27 1991

Dear Hector :-

I wasn't in the office when Keith Waldman, one of our Physicians Mutual Insurance Company representatives called to let me know of your illness, so don't know the details but thought I owe you a letter anyway as 50 years have passed with a lot of memories how you came up to this frigid country without winter coat and said it wasn't cold. A lot of memories of the days in the old St Joe hospital and how you was a leader then and continued being a leader throughout your life. I remember you going into the Army as a line officer rather than a doctor because you could do more then set a tremendous record throughout World War II.

If you are incapacitated from your illness you have many good deeds you have done throughout your life to reflect upon. I hope you are getting the same fine medical care that you have given out through your life. I know you will make a good run for it.

Agnes and I will keep you in our prayers as we think of you often and may God reward you with all the goodness and kindness you have given out in your time.

With warmest prayers I
remain, a very good friend
Arnold.
