Re: Juanita P. Euresti

Dear Dr. Garcia:

The following is a report of eye examination of Juanita P. Euresti who was seen in the office September 6, 1973.

This 75 yr. old female who was referred here by Dr. Hector Garcia. Patient experiencing sharp pain, right eye, the past two weeks. Vision has been decreasing, both eyes, the past year.

Vision: Without Rx: Right eye, CF/2 ft. Left eye, CF/2 ft.  
With Rx: Right eye, Sees hand. Left eye, CF/2 ft.  
Muscle: Orthophoric at near and distance.  
Lids: Healthy, both eyes.  
Conjunctiva: Moderate injection, right eye.  
Cornea: Diffuse Epithelial Edema, right eye. Endothelial degeneration, right eye; left eye, clear.  
Anterior-chamber: Shallow, right eye; deep, left eye.  
Iris-pupil: Right eye, mild dilation and unreactive; left eye- within normal limits.  
Lens: Right eye, mature Cataractous Lens; left eye, Senile Cataract.  
Fundus: Cannot see due to Cataract, both eyes.  
Tension: Right eye, 30 mm Hg. Left eye, 12 mm Hg.

Diagnoses: 1. Phakolytic Glaucoma, right eye.  
2. Senile Cataract, left eye.

Treatment: 1. Diamox 500 mg. caps. One every 6 hrs.  
2. Should have surgical removal of Cataract, right eye, as soon as possible. Attempted to convince her of this fact. She is to return Sept. 7, for admission.

Upon return visit, September 7, 1973, patient received pre-op check and was admitted to Memorial Hospital. On September 8, 1973, the following surgery was performed: Intracapsular Cryoextraction with full Iridectomy under general. Very, very complicated with hypermature Morgagnian Lens which ruptured during extraction and required irrigation and capsulectomy, as well.
