

"Why we should have Bilingual Education in South Texas"

I think there are many reasons why we should have Bilingual Education in South Texas. South Texas has different races of people living here. We can not separate such races to different schools. We need one students to be all together and having the same quality that any other would.

Many people speak differently or rather have different languages and writing. Bilingual Education will help each student understand the languages and writing of others. It will also help them to learn to communicate with each other. In this world we have to communicate

with other people to accomplish something. If Smith had would not have bilingual education the students would not learn to communicate or understand others who do not speak their own language. We would probably all live in separate ways from others. People would know only one language and writing and ~~we~~ they would probably pass it along to our children. We all have to know another language and writing from our ~~own~~ ^{own} every individual has a talent to inspire our nation and we can not do this, if we can not communicate with others.
