DR. HECTOR GARCIA:

I wonder what your feelings would be if these two women involved in this case were your wife and daughter.

These rapes, cut ups, shootings from rove around cars as these "animals" goes on every day in If you don't believe it, just San Antonio. go to the files of the courts here in San Antonio. Go look at the pending dockets of the various courts, just walk down the streets at night. If you are lucky enough to live, you will feel much differently than you do now. Oh yes, something should be done. Criticizing the judge in California is not the answer. Project some leadership for these juveniles --- teach them how to live in an organized society --- teach them that there is something besides rape, cuttings, shootings, beatings, etc. to prove themselves.
