Dear Dr. Garcia:

Just a note of congratulations to you and William Bonilla on your recent stand at the PASSO convention.

I heartily agree with your thinking and I'm glad to see men like you with strong, positive convictions stand up with what they think is right!

Many people could take a good lesson from your philosophy ... and if they would, a finer and clearer understanding would develop. PASSO should always be an educational and instructive lever, not a tool to be used by unions or self-centered individuals.

Keep up the good work.

Yours very truly,

GEORGE SEEBER
