Dear Dr. Garcia,

Recently, you attended my father, Pedro Perez, at Memorial Medical Center's Emergency Room. I had the pleasure of meeting you once again after many years.

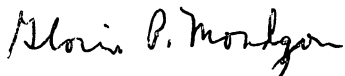

I watched, and listened as you discussed the x-rays with my father and was reminded of the person my parents spoke of so highly many times as I was growing up. A person who was caring and dedicated to his profession.

I would like to thank you for all the services you have performed for our family through the years, especially the years when my parents were struggling, and you never turned them away. As I stood there watching you with my father in the emergency room, I had flashbacks when I was a child and remembered the many times my parents rushed me over to your office when they had no or little money to pay for medical services, and you always attended to my needs. I remember a very caring, sweet and dear doctor who always managed to calm a scared little girl with reassurance and a lollipop.

When the accident occurred, my father refused to see any other doctor but you. I know why. Not only does he have faith in you as a doctor, but as a friend who wants to say thank you for being there for all of our family.

I know that I am speaking only for my family, but there are many who have been in the same situation ours has been and have not made the time to say---THANK YOU. You are a great humanitarian and a credit to your profession.

Sincerely yours,

Gloria Perez-Mondragon
